### **Registration Fees & Submission Date -**

- Registration Fees Rs. 500 per student. Last Date for Registration is **31<sup>st</sup> October 2018**
- For registrations please email us at [ibgblearningsociety@yahoo.in](mailto:ibgblearningsociety@yahoo.in)
- Please submit your project before **31<sup>st</sup> December 2018**

### **Rewards & Recognition –**

- ❖ Personalized memento cum Certificate of Excellence will be rewarded to all Approved projects. We will reserve few seats for the project winners in our 2018-19 National Finals competition for these students.

*Cultivating Academic Excellence in Geography*

Respected Teachers, Parents & Students,

It is known that children have various learning styles. They build their knowledge on varying backgrounds and experiences. It is also recognized that children have a broader range of capabilities than they have been permitted to show in regular classrooms with the traditional text-based focus. The old-school model of passively learning facts and reciting them out of context does not give sufficient exposure. Working on big project requires that students have both fundamental skills (reading, writing, and presenting) and New Generation skills (teamwork, problem solving, research gathering, time management, information synthesizing, utilizing high tech tools).

With this combination of skills, students become directors and managers of their learning process, guided and mentored by a skilled teacher and hard working parent.

Why Is Project-Based Learning Important?

- It allows a child to demonstrate his or her capabilities while working independently.
- It shows the child's ability to apply desired skills such as doing research.
- It allows the parent & teacher to learn more about the child as a person.
- It helps the parent & teacher communicate in progressive and meaningful ways with the child or a group of children on a range of issues.
- Students become engaged builders of a new knowledge base and become active, lifelong learners.
- When children are interested in what they are doing and are able to use their areas of strength, they achieve at a higher level.

We are keeping this project open to all school students from Class 2 to 10 within India. However, while evaluations we would keep in mind the age of the child submitting the project. This project is very vast and lengthy effort and the objective of this project is to enhance geographical knowledge of students. There is no short cut to success and this project requires a lot of time and energy in research, internet usage, exploring maps and geography books, finally putting down everything in writing.

Parents most importantly are expected to be mentors for their wards as no teacher can match the dedication, hard work and sincerity of a parent. Utilize your summer, Diwali and Christmas vacations along with weekend and other festival holidays in this project. Please keep your focus towards learning. Winning or losing is not important; learning is important.

Do register. We would be accepting limited submissions.

Thanking You,

Yours Faithfully,

**Mrs. Priyanka Vishal Bagaria**
